#### Summary

First Stakeholder's group, with ALOEN, Lorient Agglomération and a local industrial group (DCNS). This meeting was set up in order to organise all of the questions about monitoring which were pending.

Empower is a new European project which can continue work done by other ending projects (BIEN LA, SOLENN) or be included in a regional monitoring/smart grid frameworks (SMILE)

### Conclusions & lessons learnt

This meeting set up the priority questions from the SH's group:

**What to ask the system designers as data, as energy criteria to be measured and monitored? What numerical objectives? What standards? What indicators?"**

**What communication? Which display? What return on investment?"**

Experience of Saint Sulpice Smart City was discussed. It is relevant with EMPOWER and needs to figure in the good practices register.

### Programme:

- Definition of the actions carried out jointly by ALOEN, Lorient Agglomération and Lorient Ville (EMPOWER, PEEC, BIEN LA, SOLENN, etc.)
- Definition of the actions carried out by DCNS; Duration of the study; - Input/output data; - Study objectives.

### Work for the next period:

Continue to implement EMPOWER's outputs in local projects.  
Create a local community in order to build a local monitoring framework.

### Comments:
